

What do you LIKE about this vision?

OPTION B: South Maui is a place for connection with the 'āina, the kai and each other. The region is infused with green - community gardens and parks, shaded paths and playgrounds. Affordable housing is close to good jobs and people are able to move through South Maui safely and easily with a variety of transportation options.

Affordable housing, parks and playgrounds. Variety of transportation options.
Community parks, gardens, paths. 'Affordable housing' integrated.
Nothing
I like this vision of South Maui too, because it is focused on residents
Infused with green
This is more realistic than Option A.
Everything
good but why cant there be one vision with option a , b , c and d combined to one statement
all these sounds lovely ...
This is a beautiful vision, but it is lacking in mentioning our visitor and part time community. South Maui has been developed as a place for residents and visitors to come together, and not mentioning how visitors have a place in the community leaves a big hole. It is true that south maui has lacked purposeful enriching development for our residents, but likewise, if we do not include how to utilize and project into the future how we want regenerative sustainable visitor industry, we will not meet that goal.
Better than the first. Addresses pretty much the same thing but ads the key words "affordable housing" and "good jobs" as well as transportation and safety.
Not much.
Community gardens are good. Shaded paths beneficial.
Like it all
Green is nice. And easy movement is very important to a sense of well-being.
I like the idea of community gardens and parks.
Affordable housing is close to good jobs and people are able to move through South Maui safely and easily with a variety of transportation options,

What do you LIKE about this vision?

OPTION B: South Maui is a place for connection with the ‘āina, the kai and each other. The region is infused with green - community gardens and parks, shaded paths and playgrounds. Affordable housing is close to good jobs and people are able to move through South Maui safely and easily with a variety of transportation options.

What community gardens? I see none. We need them. We need shaded playgrounds and affordable housing. We need better transportation options for sure.

Sounds really good! It is so important to be stewards of the ‘āina.

It's idyllic and a step in the right direction.

I like the idea of creating areas for green space and accessible transportation to reduce the traffic on the island. I think we need to connect Liloa Dr., the road that runs parallel to South kihei rd to reduce traffic and provide more safe outlets.

Paradisial

I like the inclusivity that is written in this vision. I believe community plan has to think further and deeper to serve the community that is less economically advantaged community like the middle class people, working class, etc.

Travel options affordable housing

Affordable housing near work. Community gardens

Parks, playgrounds, affordable housing.

Sounds great!

Great idea but affordable housing needs to meet real world parameters.

Sounds good.

Open access to community gardens and affordable housing. Restoration of the land with more sustainable farming practices and allowing traditional water flow.

Green community gardens and affordable homes

Community gardens and parks.
Affordable housing is close to jobs-meaning I hope in Wailea...

Like the emphasis on community gardens, shade and parks.

This is definitely better than Option A. I think this one is more reflective of what South Maui is and where we need to go. I especially like the reference to affordable housing and moving through South Maui safely--South Kihei road is dangerous for pedestrians, especially.

What do you LIKE about this vision?

OPTION B: South Maui is a place for connection with the 'āina, the kai and each other. The region is infused with green - community gardens and parks, shaded paths and playgrounds. Affordable housing is close to good jobs and people are able to move through South Maui safely and easily with a variety of transportation options.

I like the idea of paths and a variety of transportation options. Affordable housing is important.
Again, that is about residents and an easier time being able to enjoy the land and parks. I like that transportation has been addressed. Living off S Kihei road and trying to get anywhere is being a nightmare with the amount of rental cars back on the road. I would love to see shuttle buses only for tourist. Definitely need more affordable housing for residents and less hotels and vacation rentals
The transportation vision. Wish it had sobering about biking lanes
The connection with the aina, the kai, and each other. The ability to move safely and easily in shaded paths, that are filled with community gardens and parks. Plus affordable housing close to good jobs.
Affordable housing and stop pushing locals out to new residents
There is no mention of tourism integration with the community.
This sounds like vision A+ I like it but can we make sure the affordable housing is on pilings because the Kihei Wailani Village is going to flood as well as the Hoolani subdivision.
I like the first sentence and description to support in second. I like that it discusses affordable housing and jobs.
I like the idea of community gardens and parks, shaded paths and playgrounds, with transportation options.
Love more affordable housing, and the parks for families to enjoy without having to pay.
Everything
I like the inclusion of transportation options. I would include less or little traffic. again balance and connection.
Everything
Everything, especially the transportation options, and more green. Planet is warming, kihei needs shade, housing close to jobs cuts down on traffic
Better transportation options.

OPTION B: South Maui is a place for connection with the ‘āina, the kai and each other. The region is infused with green - community gardens and parks, shaded paths and playgrounds. Affordable housing is close to good jobs and people are able to move through South Maui safely and easily with a variety of transportation options.

I like community gardens, parks and playgrounds. Also affordable housing and variety of transportation options.
I think affordable housing is essential to a safe community. When people drive through an area to get to work, they are aware of how inconvenient it is for them, but also how lucky others are to live where they work. By making sure that everyone can live here we will increase the power of the community.
A variety of transportation options.
I love the emphasis on community gardens and parks all around.
Very good ideas! Affordable housing for everyone.
All aspects but needs to include more focus on safe walking, biking and driving with multiple points of ingress and egress if accidents etc.
South Maui is infused with green. Barney Eiting, one of the founders of the KCA planning and development committee had a vision of Kihei as a "Town with in a Park". Homes, jobs, recreation, shops and amenities are close together within walking distance.
Moving through Maui with a variety of transportation options is key.
What I like best is the idea of affordable housing. Home prices are completely out of control on Maui. I feel that families are probably doing without critical necessities and medicines to be able to afford to live on Maui. Perhaps the expansion of self sustaining farming opportunities will provide more jobs and allow people to live on Maui affordably without giving up their basic needs. Electric vehicle incentives would go a long way in cleaning up the environment and pollution.
Better than option A for sure.
It sounds realistic.
Resonates much more than option A. Love "connection". It's aspirational that housing is "affordable" is this possible?
Absolutely love the fact that it includes the land, the ocean and the people of the island! Also that there will be a community garden for families to take care and having true affordable housing for the people is very good! Especially since we never know what will come ahead!

What do you LIKE about this vision?

OPTION B: South Maui is a place for connection with the 'āina, the kai and each other. The region is infused with green - community gardens and parks, shaded paths and playgrounds. Affordable housing is close to good jobs and people are able to move through South Maui safely and easily with a variety of transportation options.

gardens, paths
again - a dream -
Affordable housing & playgrounds. Green parks.
Sure...we live in a perfect world.
Everything else.
once again the vision is similar to A with a slight difference but reflects what South Maui could be, which is so far from what it is.
Walking and biking paths 'Āina, kai (this should really be considered similar to Beaches, coastal waters, wetlands with some additions, possibly also traditional knowledge and cultural resources) Community gardens, playgrounds Parks, shaded paths Affordable housing, good jobs
I like this vision for South Maui.
Variety of transportation is important.
Already crowded. No more housing unless it is up at end of lipoa.. no great jobs UNLESS you make call centers up there near the brewery... where there is space. The future is technology and the kids love it
Mention of the connection people to 'āina, kai etc. Compact community - people to jobs to multimodal options to affordable housing
