

What do you LIKE about this vision?

OPTION C: South Maui is revitalized and resilient, sustainable and strong. Its beaches, waters and wetlands are restored and its people value the history and traditions of the land on which they live. Residents work together to care for their home and adapt to ever-changing conditions, while building a sense of place and the small town lifestyle. With affordable housing close to good jobs, a transportation system that focuses on moving people, not just cars, and services that meet local needs, South Maui works for everyone.

I like this one a lot. Keeping our history and traditions. System that focuses on moving people in every way. Affordable housing not too many Hotels where we loose our beaches and views as we drive along the coastline. That's why we love driving to Lahaina with the long scenic ocean views along the drive. Seeing places near the beaches with parks where families can gather. Keeping ng the small town lifestyle.

Sense of place and small town lifestyle.
'Affordable housing' integrated.
Nature's water features preserved.

It would be good if it were true.

Nothing.

Option C sounds like a more nuanced version of Options A and B. I like Option c too.

Small town lifestyle

Better than A and B.

Sounds like a community that really values their neighbors

see my previous comment - one vision incorporates all four options

This is a beautiful vision, but it is lacking in mentioning our visitor and part time community. South Maui has been developed as a place for residents and visitors to come together, and not mentioning how visitors have a place in the community leaves a big hole. It is true that south maui has lacked purposeful enriching development for our residents, but likewise, if we do not include how to utilize and project into the future how we want regenerative sustainable visitor industry, we will not meet that goal.

Has all the same "buzz words" as the others.

Not much.

Restoring wetlands is good.

I like it all also.

More of everything for everybody.

OPTION C: South Maui is revitalized and resilient, sustainable and strong. Its beaches, waters and wetlands are restored and its people value the history and traditions of the land on which they live. Residents work together to care for their home and adapt to ever-changing conditions, while building a sense of place and the small town lifestyle. With affordable housing close to good jobs, a transportation system that focuses on moving people, not just cars, and services that meet local needs, South Maui works for everyone.

I like the idea of "residents working together to care for their home and adaptation to ever-changing conditions." I also like having a community which feels like a "small town."
All of it
Everything!
I like everything about this vision.
This is how it should be.
I like the sound of the vision, but it's not very specific. Creating a small community feel with farmers markets, accessible and safe walking paths, bike lanes and unique transportation options like shuttle or street car is most important to me.
Lovely
I love this vision better. This sounds more compelling than Vision A and B. It also has clearer statement. It got the inclusion at the heart.
Affordable housing
Affordable housing, restored wetlands and beaches/ocean. Services that meet local needs
Homage to the importance of community Restoration of natural coastal and wetland habitat Sense of place Affordable housing
Like it!
Sounds good but defining "good jobs" is necessary. Maui needs to attract businesses that are high paying and high tech that is remote friendly. Public transportation needs to be more widespread to be effective in reaching a satisfactory level of convenience
Sounds good especially the small town lifestyle.
Sounds nice.
All of it!

OPTION C: South Maui is revitalized and resilient, sustainable and strong. Its beaches, waters and wetlands are restored and its people value the history and traditions of the land on which they live. Residents work together to care for their home and adapt to ever-changing conditions, while building a sense of place and the small town lifestyle. With affordable housing close to good jobs, a transportation system that focuses on moving people, not just cars, and services that meet local needs, South Maui works for everyone.

Everything. This once seems to be the most visionary with words that seem to project a real outcome.
Restored beaches, waters, and wetlands. Really like small town lifestyle and residents working together.
The first sentence is nicely idealistic, but I prefer the last two sentences. Again, I like the emphasis on affordable housing, and transportation system focusing on moving people.
Restoring the beaches, waters and wetlands is a noble goal. But restore them to what? They can never be healthy with thousands and thousands of tourists using them every day. In kihei, there is no there - there. It would be nice for it to have a sense of place and a small town feel.
I love that it mentions the restoration of its beaches, waters, and wetlands. Plus that people value history & traditions, and they work together to care for their home and small town lifestyle. Also its focus on affordable housing that are close to good jobs.
This is more inclusive of the tourism that lines our coastal areas. Increasing transportation and safe public parking with signage. The noncompliance of zoning and pride of ownership needs to be addressed.
Sorry they all sound the same.
recognition of ever changing conditions, need for affordable housing and good jobs. Transportation system focused on how to move people (not cars!). Small town lifestyle (while it needs more definition, it shows a sense of community).
Beaches, waters and wetlands are restored and people value the history and traditions of the area, along with preserving a sense of place and small town lifestyle.
I like that this would give more affordable housing but would not like to see small town lifestyle if that means more shopping areas, it is almost impossible for local small business to operate in these malls, and shopping centers because the rents are so outrageous
Adapt to ever-changing conditions? Does that mean new hotels, tourist accommodations?
again not tourist based....is anyone getting the message.
Everything, especially restoration, and adaptability
This is a good, detailed vision statement. I like the emphasis on local needs, and keeping a small town lifestyle.
transportation system

With affordable housing close to good jobs, a transportation system that focuses on moving people, not just cars, and services that meet local needs, South Maui works for everyone.

"Restored beaches, waters and wetlands" Building a Small town lifestyle Moving people, not just cars Adapt to changing conditions Resilient and sustainable
Love it.
All of it.
I like the focus on beaches, waters, and wetlands, as well as focusing on building a sense of community and small town lifestyle.
yes, sounds like a combination of option A and B.
all good, needs focus on safer movement of people - safe walking, biking alternative transit good idea.
Very inclusive of ideals economy, natural environment, culture, family working together, sense of place, small town, walkability. It's mostly all there.
The fact that you mention sustainable/restored BEACHES. Sense of place is also huge. Transportation system that has more stops, more buses running, etc.
This is perfect! If we can achieve this I think Maui would be the example that everyone else tries to follow.
Not much.
This sounds good and vibrant.
Live this even more than the previous statements.
This is my favorite! It describes South Maui very well! And shows how the community will be working together to make the land a better beautiful place to live. Also how it talks about meeting the locals needs because the locals are the ones that thrive to see the land survive and last for generations to come!
care of resources, resiliency
nice to dream - where are the tourists? Where is what makes money/ where is what provides jobs?

With affordable housing close to good jobs, a transportation system that focuses on moving people, not just cars, and services that meet local needs, South Maui works for everyone.

Restore area, small town lifestyle.
All good. Not sure what the emphasis is here (as opposed to B)
Just different words but the essence of option a and b Basically you are looking at one vision of all three options
Traditional knowledge (cultural resources) Walking and biking paths, Beaches Coastal waters, wetlands Affordable housing, good jobs Sense of place, small town Services for local needs
I like this vision for South Maui
Balanced concept, small town lifestyle.
Sounds good no way it is possible
