Transportation Testimony

Aloha team

Couldn't stay longer. Some points:

- get employers to install EV chargers for their workers. That lets them charge at work using solar instead of charging at home at night using oil. Saves energy, saves workers having to put in home chargers.
- make the crowded part of SKR a one way street. Smooths flow, allows amenities, improves safety
- provide pedestrian/cycling path Mauka of Pi'ilani from Ohukai to high school and Lipoa to high school. Lots of housing there. DOT guy talked of cyclists on the highway. Bad idea.
- Add crosswalk at intersection by police station. No safe crossing now.
- KHS kids need underpass. KCS kids not safe crossing at Lipoa.
- electric buses
