To the South Maui Community Plan Advisory Committee

Re: Return the former "Mega Mall" site to Residential designation

The South Maui community has already spoken more than enough, and fought long and hard enough, to stop the creation of more traffic-generating commercial space in North Kihei, and it has to be recognized that ANY development will be likely to worsen the flooding and reef-damaging run-off from storms.

Abruptly changing the hard-won residential category for this area goes against all the community wants and needs. Carefully planned and constructed housing with good planning for water use and water run-off is not only badly needed but the best plan for the area.
